

Section 10 Scoreboard

Similar to the CCAA Weekly National Rankings, the CCAA Scoreboard serves primarily as a means for further promoting and enhancing the credibility of CCAA sports and student-athletes across the country. Reporting game scores and results on a regular and timely basis allows the media to access up-to-the-minute results and current standings as games are concluded.

10.1 Updating Procedures

- 10.1.1 It is the responsibility of the **home** team to report all scores following each competition in any **team** sport by logging onto the new WebSyncSM site (www.dakstats.com/websync).

The home team has **4 hours** to input the score following the game. Any failure to input the score will result in a fine as described below. If any technical problems occur which hinder the uploading of the score, the home team must contact the National Office. (Note: *Complete score reporting procedures are sent to Athletic Directors prior to the season and can also be found on the CCAA official website at www.ccaa.ca*)

- 10.1.2 For volleyball, match results must include games scores (i.e. 25-13, 25-23, etc.)

- 10.1.3 The CCAA is currently reviewing the score reporting procedures for non-conference, exhibition and tournament play. Until further notice, exhibition and tournament results must be sent to the National Office to input manually and post directly on CCAA website.

10.2 Fines for failure to report within deadline

The CCAA shall impose a fine to any member-institution who fails to input game scores and results in DakStats.

- 10.2.1 The home team shall report each score no later than 4 hours after completion of the game.

If the National Office is required to input a missing score, the CCAA will impose a fine in the amount of \$25 to the home team.

- 10.2.2 These fines shall be imposed from September 1 to March 30 of every year. Each member-institution shall hence start the following season without penalties.
